

Larissa Moro de Souza dos Santos

Frontend Developer

(51) 995311872 | lari.moro20@gmail.com | São José, SC - Brazil | [linkedin.com/in/lari-moro-ss/](https://www.linkedin.com/in/lari-moro-ss/)

github.com/LariMoro20 | <https://larissa-santos.vercel.app/>

PROFESSIONAL OBJECTIVE

Frontend Developer with 9+ years of experience, strong expertise in the Vue.js ecosystem, and a fullstack background. I am not limited to a single stack; I have experience with multiple frameworks and adapt well to different contexts and technologies. I make thoughtful technical decisions, apply best practices such as SOLID principles, and continuously pursue technical growth. I aim to be part of an environment where clean, well-crafted code matters and where I can contribute both in execution and in solution discussions.

PROFESSIONAL EXPERIENCE

Frontend Developer III (Full-time)

DataHub Analytics | 2021 – Present (4 years) | Remote

Development of web applications using Vue.js and Quasar Framework, focusing on component-based architecture, SPA development, performance, and best practices. Participated in the architecture and planning of five different applications, integrating REST and GraphQL APIs via Apollo Client, managing state with Pinia, developing web components, and applying design systems.

Contributed to the modernization of more than 10 legacy system screens built with Java PrimeFaces, including optimization of relationship tree generation scripts and improvements to PDF plugins. Reduced document size from up to 80 pages to 20 pages, achieving gains in web performance, readability, and maintainability.

Implemented automated testing with Cypress and Vitest. Worked with Gitflow and Azure DevOps, supported multidisciplinary teams, and was internally promoted to Frontend III based on technical performance and team contributions.

Fullstack Developer – Frontend Focus (Contractor)

Inventsys Brazil | 2021 (5 months) | Remote

Development and maintenance of management software using Laravel, Vue.js, and Quasar Framework. Implemented new features, fixed bugs, and continuously improved high-availability applications.

Worked in a Scrum environment using Gitflow, ensuring organized deliveries within deadlines.

Fullstack Developer (Full-time)

OnPlay | 2017 – 2021 (4 years) | On-site & Remote

Development and maintenance of websites, web systems, and cross-platform applications, working autonomously throughout the entire lifecycle from conception to delivery.

Delivered over 20 projects, including websites and systems for local companies. Built custom systems using PHP (CodeIgniter), MySQL, HTML, CSS, JavaScript, jQuery, and Bootstrap.

Performed database modeling, hosting management via FTP, cPanel, Locaweb, and Hostinger, and collaborated directly with clients on layout and product alignment.

Developed Android applications with Ionic for embedded systems in gas stations and hotel environments.

TECHNICAL SKILLS

Core Expertise: Vue.js, Vue 3, Composition API, Quasar Framework, Vuetify, JavaScript, TypeScript, HTML5, CSS3, Pinia, Pinia Colada, Axios, Apollo Client, WordPress, Responsive Design, Acessibilidade Web, Cross-browser Compatibility

Professional Experience With: React.js, Next.js, Nuxt.js, Node.js, GraphQL, REST APIs, Cypress, Vitest, ESLint, Laravel, PHP, Tailwind CSS, DaisyUI

Tools & Infrastructure: Git, Gitflow, Docker, Azure DevOps, CI/CD, Postman, Figma, Visual Studio Code

Methodologies: Scrum, Componentização, Prototipação, Code Review

AI & Productivity Tools: Claude Code, Google Gemini, Leonardo.ai

Languages: Portuguese — Native | English — Intermediate (advanced technical reading proficiency)

EDUCATION

- **Associate Degree in Systems Analysis and Development** - Instituto Federal de Educação, Ciência e Tecnologia do Rio Grande do Sul · 2017 – 2022
- **Technical Degree in Information Technology** - Instituto Federal de Educação, Ciência e Tecnologia do Rio Grande do Sul · 2012 – 2016

TALKS & MENTORSHIP

- **Speaker** — Claude Code in Action: From Prompt to Code · Nuvini · Oct/2025
- **Speaker** — UX/UI and Frontend Development · DataHub Analytics · Jun/2023
